

Tracer BPI3

Reference: BDE K 239

Internal reference material for bovine Parainfluenza 3 virus serology by ELISA

For veterinary *in vitro* use only

Pathology concerned

Respiratory pathology caused by bovine Parainfluenza 3 virus.

Designation

Internal reference material for bovine parainfluenza 3 (BPI3) serology by ELISA.

Product reference

BDE K 239 - 1 vial of 0,5 mL

Method of production

Material obtained from a BPI3-seropositive cattle.

Intended use

This material can be used to evaluate and verify the fidelity of analyses. It can be used, for example, as a tracer for control charts.

Refer to the certificate of analysis for target values.

Instructions for use

It should be treated as a sample. Dilutions are to be made with the dilution solution of the kit in use. 1/100 dilution for BIO K 239.

Storage

Keep refrigerated at 5°C (± 3° C).

Special biosafety measures

No specific measures (see MSDS).

Disposal

In accordance with user laboratory procedures.
